ABOUT AMERICA II

Established in 1989, America II Electronics, Inc. is a global leader in component distribution. We stock more than four billion components, making us one of the world's largest distributors of semiconductors and electronic components. Through our franchise and direct distribution lines, America II serves as a primary partner for all OEM and EMS customers. Headquartered in St. Petersburg, Florida and with offices in the UK, Germany, China, Japan, Singapore and Mexico, America II also provides value-added services and inventory solutions from our ISO 9001 and ESD-certified 420,000 square foot North American distribution facility.

INVENTORY SOLUTIONS

America II is the industry's inventory solutions expert, providing a wide range of programs for our worldwide customers. Our 420,000 square foot distribution facility and Inventory Business Group provide the logistics power to handle your excess inventory and design solutions that address your unique needs.

- Line Item Purchasing
- Lot Purchasing
- Consignment
- Asset Management
- End-of-Life Buys

GLOBAL COMMITMENT

America II has a worldwide presence with offices around the world, allowing us to service customers in practically any region. Each of our offices has multilingual representatives on site to assist with customer needs in the most convenient way possible.

COMPANY HISTORY

With a dream of establishing a successful distributorship in the integrated circuit market, Mike Galinski founded America II Electronics in 1989. Since that time, the company has grown from its St. Petersburg, Florida roots into one of the most successful distributors of electronic components in the world.

America II had an eye on expansion since its inception, and in 1994 opened its UK operation, America II Europe Ltd. With a presence on two continents, Asia soon became the next logical stop on the America II expansion list. In 2000, America II opened its Mexico office and the Yokohama location in Japan jumpstarted the Eastern expansion. Offices followed in Singapore in 2004 and China in 2011. In the midst of its Asian expansion, America II also broadened its stake in Europe with the founding of its Germany location in 2002.

The year 2014 marked America II's 25th year in business. Since our inception, America II has become an integral part of the electronic components supply chain, partnering with the industry's top manufacturers and servicing OEM and EMS companies around the world. We are proud and honored to celebrate this historic milestone.

"In business, reputation is everything and companies aren't successful by luck," said Michael Galinski, America II Electronics' Chief Executive Officer. "America II has spent over 25 years building its brand, refining the business, and earning our customers' trust. Many factors have contributed to our success, but it all comes down to our quality, inventory and people. Those are the three things most important to customers, and those are the three things we focus on. That's been the driving force behind our longevity."
